<b>Product name:</b> IgY - Anti-Candida albicans antibody		
<p><b>Candida albicans</b> is a dimorphic fungus that grows both as yeast and filamentous cells and one of the few species of the Candida genus that cause the infection candidiasis in humans. <i>C. albicans</i> is responsible for 50–90% of all cases of candidiasis in humans. Systemic fungal infections (fungemias) including those by <i>C. albicans</i> have emerged as important causes of morbidity and mortality in immunocompromised patients (e.g., AIDS, cancer chemotherapy, organ or bone marrow transplantation).</p>

**Application (only for *in vitro* diagnostics):** This product is for Research and Development use only. It must not be used as a remedy and not as an *in vivo* application. Foam or bubble development should be avoided. Any unused stock solution must then be divided into aliquots and frozen at -20°C. Repeated freezing and thawing is not recommended. For optimal immunoassay application we recommend to perform a chessboard titration (CBT) to avoid false-positive results.
