

Safety Data Sheet

Complies Regulation (EC) No. 1907/2006 (REACH), Annex II,
modified according to Regulation (EC) 453/2010 - Europe

ANTIGENES GmbH

Labordiagnostika

Römerstraße 20-22

D-58332 Schwelm

Germany

Tel.: +49 2336 9154958

Fax: +49 2336 9154957

Email: info@antigenes.de

SemenStain

1. Identification of the substance/mixture and of the supplier

Product name: SemenStain
Article number: ZR10050/10250
Application: Semen staining, spermogram
In vitro diagnostics
Manufacturer: ANTIGENES GmbH, Römerstraße 20-22, 58332 Schwelm, Germany
Homepage: www.antigenes.de
E-Mail: info@antigenes.de
Distribution: ANTIGENES GmbH, Römerstraße 20-22, 58332 Schwelm, Germany
Emergency call: For Germany
 +49 (0) 551 - 19240 Giftinformationszentrum Nord

2. Hazards

2.1 Classification and labeling

Classification according to Regulation (EC) No. 1272/2008. Classification according to Directive 67/548 / EEC or Directive 1999/45 / EC. Labeling according to Regulation (EC) No. 1272/2008. The substance / product is classified and labeled according to the CLP Regulation.

Formaldehyde

Toxic

Health Hazard

Corrosive

Special risks and safety tips

R23/R24/R25 Toxic by inhalation, in contact with skin and if swallowed.

R34 Causes burns.

R43 May cause sensitization by skin contact.

S1/S2 Keep locked up and out of the reach of children.

S26 In case of contact with eyes, rinse immediately with plenty of water and seek medical advice.

S36/37/39 Wear suitable protective clothing, gloves and eye/face protection.

S45 In case of accident or if you feel unwell, seek medical advice immediately (show the label where possible).

S51 Use only in well-ventilated areas.

Hazard and safety instructions

H301/H311/H331 Toxic if swallowed, in contact with skin or if inhaled.

H314 Causes severe skin burns and eye damage.

H317 May cause an allergic skin reaction

H341 Suspected of causing genetic defects (state route of exposure if it is conclusively proven that no other routes of exposure cause the hazard).

H350 May cause cancer (state route of exposure if it is conclusively proven that no other routes of exposure cause the hazard)

P201 Obtain special instructions before use.

P260 Do not breathe dust/fume/gas/mist/vapors/spray.

P280 Wear protective gloves/protective clothing/eye protection/face protection.

P301/P330/P331 IF SWALLOWED: Rinse mouth. Do NOT induce vomiting.

P303/P361/P353 IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water [or shower].

P304/P340 IF INHALED: Remove person to fresh air and keep comfortable for breathing.

P305/P351/P338 IF IN EYES: Rinse cautiously with water for several minutes.

Remove contact lenses, if present and easy to do. Continue rinsing.

P308/P311 IF exposed or concerned: Call a POISON CENTER/doctor/...

P403/P233 Store in a well-ventilated place. Keep container tightly closed.

Ethanol**Special risks and safety tips**

R11 Highly flammable.
 S2 Keep out of the reach of children.
 S7 Keep container tightly closed.
 S16 Keep away from sources of ignition — No smoking.

Hazard and safety instructions

H225 Highly flammable liquid and vapor
 P210 Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.

Bengal red**Special risks and safety tips**

no R- and S-phrases

Hazard and safety instructions

no H- and P-phrases

Pyronin G**Special risks and safety tips**

no R- and S-phrases

Hazard and safety instructions

no H- and P-phrases

Phosphomolybdate**Special risks and safety tips**

no R- and S-phrases

Hazard and safety instructions

no H- and P-phrases

Fastgreen FCF**Special risks and safety tips**

R68 Possible risk of irreversible effects.
 S36/S37 Wear suitable protective clothing and gloves.

Hazard and safety instructions

H341 Suspected of causing genetic defects (state route of exposure if it is conclusively proven that no other routes of exposure cause the hazard).
 P281 Use personal protective equipment as required.

Janus green**Special risks and safety tips**

no R- and S-phrases

Hazard and safety instructions

no H- and P-phrases

2.2 Other hazard statements

All chemicals are potentially dangerous. They are therefore only be handled by specially trained personnel with the necessary care.

3. Composition/ingredients

Compounds	Reagents	CAS-Code	Quantity
Solution 1	Formaldehyde	50-00-0	<1 %
	Ethanol	64-17-5	<10 %
	H ₂ O	7732-18-5	>89 %
Solution 2	Neutral red	553-24-2	<1 %
	Bengal red		<1 %
	H ₂ O	7732-18-5	>98 %
Solution 3	Pyronin G	92-32-0	<1 %
	Orange G	1936-15-8	<1 %
	Phosphomolybdate	51429-74-4	<1 %
	H ₂ O	7732-18-5	>97 %
Solution 4	Fastgreen FCF	2353-45-9	<1 %
	Janus green	2869-83-2	<1 %
	H ₂ O	7732-18-5	>98 %

4. First aid measures**4.1 Description of first aid measures**

After inhalation of dusts: supply fresh air; if any symptoms occur seek medical advice.

After skin contact: wash with water.

After eye contact: rinse with open eyelid for 10 minutes under running water and seek medical advice.

After swallowing: rinse mouth and then drink water.

If symptoms persist seek medical advice.

4.2 The most important acute and delayed symptoms and effects

Cause irritation, cough, stomach and intestinal disorders

4.3 Indication of immediate medical attention and special treatment

Skin contact: rinse out quickly and thoroughly with water. Continue to monitor skin. Consult a doctor if any swelling occurs.

Revenue: immediately spit out and rinse thoroughly with water. If any discomfort is felt, consult a doctor immediately.

Eyes: Rinse immediately with an eyewash. Rinse the eyes thoroughly under running tap water. Keep an eye on the eyesight and look for a doctor during the deterioration.

Inhalation: Immediately breathe fresh air, rest and breathe in and out several times. Call a physician if the deterioration occurs.

5. Fire fighting measures**5.1 Extinguishing media**

Suitable extinguishing agents: Use fire fighting measures that suit the environment.

Unsuitable extinguishing agents: for this substance / mixture no limitations of extinguishing agents are known.

5.2 Special hazards arising from the substance or mixture

Product non-combustible.

Ambient fire may liberate hazardous vapors.

In case of fire can be released: Carbon monoxide and carbon.

5.3 Advice for firefighters

Protective equipment: Wear self-contained breathing apparatus.

6 Accidental release measures**6.1 Personal precautions, protective equipment and emergency procedures**

Avoid skin and eye contact. Do not breathe dust.

6.2 Environmental precautions

Do not flush into sewers or waterways.

6.3 Methods and material for containment and cleaning up

Pick up mechanically. Dispose of the captured material properly. Clean the area with gloves and masks with water and dry thoroughly. Air the room. Wash coat and contaminated clothing.

7 Handling and storage

Store at room temperature (15-25°C).

8 Exposure controls/personal protection

Wear gloves, mask and coat while handling during the execution. Avoid smoking and acting with high heat-generating appliances.

9 Physical and chemical properties**9.1 Information on basic physical and chemical properties**

11 Toxicological information (based on individual ingredients of the solution(s))

Formaldehyde

Dangerous health effects

Classification-relevant LD₅₀ / LC₅₀ values:

Oral LD₅₀ 100 mg/kg (rat)

Dermal LD₅₀ 270 mg/kg (rabbit)

Inhaled LC₅₀ 0,578 mg/l (rat) /4 h

Primary irritation: On the skin: Risk of skin resorption. Danger of skin sensitization

On the eye: teariness caused by fumes

After inhalation: no irritant effect

Sensitization: possible through skin contact Sensitization possible

Subacute to chronic toxicity: Evaluation of formaldehyde by IARC and BfR: Carcinogenic to humans. There is a suspicion of a carcinogenic effect.

Additional toxicological information: After swallowing irritation in the mouth, throat, esophagus, gastrointestinal tract.

Further information: The product must be handled with the care necessary with chemicals.

Bengal red

Dangerous health effects

Classification-relevant LD₅₀ / LC₅₀ values:

Quantitative data on the toxicity of this product are not available.

Primary irritation:

On the skin: prolonged or repeated contact can cause skin irritation.

On the eye: May be irritated by intensive exposure.

After inhalation: in case of massive exposure to dust the respiratory tract can be irritated.

Sensitization: No sensitizing effects known.

Germ cell mutagenicity: no data available.

Carcinogenicity: no data available.

Reproductive toxicity: no data available

Aspiration hazard: not applicable

Specific target organ toxicity in one-day exposure: the substance or mixture is not classified as a target antidepressant, one-off exposure.

Specific target organ toxicity in the case of repeated exposure: the substance or mixture is not classified as a target antidepressant, repeated exposure.

Additional toxicological information: When used and handled according to specifications, the product does not have any harmful effects according to our experience and the information available to us.

Further information: The product must be handled with the care necessary with chemicals.

Neutral red**Dangerous health effects****Classification-relevant LD₅₀ / LC₅₀ values:**

Quantitative data on the toxicity of this product are not available.

Primary irritation:

On the skin: prolonged or repeated contact can cause skin irritation.

On the eye: may be irritated by intensive exposure.

After inhalation: in case of massive exposure to dust the respiratory tract can be irritated.

Sensitization: no sensitizing effects known.

Germ cell mutagenicity: no data available.

Carcinogenicity: no data available.

Reproductive toxicity: no data available.

Aspiration hazard: not applicable.

Specific target organ toxicity in one-day exposure: the substance or mixture is not classified as a target antidepressant, one-off exposure

Specific target organ toxicity in the case of repeated exposure: the substance or mixture is not classified as a target antidepressant, repeated exposure

Additional toxicological information: for aromatic amines in general:

Systemic effect: Methaemoglobinaemia with headache, cardiac arrhythmias, drop in blood pressure, shortness of breath and cramps, leading symptom: Cyanose (blue staining of the blood).

Further information: The toxicological properties of the product have not yet been fully investigated, dangerous properties cannot be excluded. The product must be handled with the care necessary with chemicals.

Pyronin G**Dangerous health effects****Classification-relevant LD₅₀ / LC₅₀ values:**

Quantitative data on the toxicity of this product are not available.

No acute poison information is available for this product

Chronic toxicity: the toxicological properties have not been fully investigated.

Complete information can be found in RTECS.

Orange G**Dangerous health effects****Classification-relevant LD₅₀ / LC₅₀ values:**

Quantitative data on the toxicity of this product are not available.

Primary irritation

On the skin: no irritation

On the eye: may be irritated by intensive exposure

After inhalation: in case of massive exposure to dust, eyes and respiratory tract may become irritating

Sensitization: no sensitizing effects known

Specific target organ toxicity in one-day exposure: the substance or mixture is not classified as a target antidepressant, one-off exposure.

Specific target organ toxicity in the case of repeated exposure: the substance or mixture is not classified as a target antidepressant, repeated exposure.

Additional toxicological information: When used and handled according to specifications, the product does not have any harmful effects according to our experience and the information available to us.

Further information: The product must be handled with the care necessary with chemicals.

Phosphormolybdate**Dangerous health effects**

Classification-relevant LD₅₀ / LC₅₀ values: quantitative data on the toxicity of this product are not available.

Specific symptoms in animal experiments: no data available

Primary irritation:

On the skin: caustic effect on the skin and mucous membranes.

On the eye: causes serious eye damage. Danger of blindness!

After inhalation: after inhalation of dusts / aerosols: Mucosal irritation, cough, resorption.

Sensitization: no sensitizing effects known.

Specific target organ toxicity in one-day exposure: the substance or mixture is not classified as a target antidepressant, one-off exposure.

Specific target organ toxicity in the case of repeated exposure: the substance or mixture is not classified as a target antidepressant, repeated exposure.

Additional toxicological information: after swallowing: burns in mouth, throat, esophagus and gastrointestinal tract.

Further information: The product must be handled with the care necessary with chemicals.

Janus green

Dangerous health effects

Classification-relevant LD₅₀ / LC₅₀ values: Quantitative data on the toxicity of this product are not available.

Primary irritation:

On the skin: repeated or prolonged contact may cause skin irritation.

On the eye: may be irritated by intensive exposure.

After inhalation: in case of massive exposure to dust, eyes and respiratory tract can become irritable.

Sensitization: no sensitizing effects known.

Specific target organ toxicity for single exposure: The substance or mixture is not classified as a target antioxidant, one-time exposure.

Specific target organ toxicity on repeated exposure: The substance or mixture is not classified as "target toxic", repeated exposure.

Further information: The toxicological properties of the product have not yet been fully investigated, dangerous properties cannot be excluded. The product must be handled with the care necessary with chemicals.

Fastgreen FCF

Dangerous health effects

Classification-relevant LD₅₀ / LC₅₀ values:

Oral LD₅₀ > 2000 mg/kg (rat) (RTECS)

Primary irritation:

On the skin: no data available.

On the eye: slight irritation.

After inhalation: no data available.

Sensitization: no sensitizing effects known.

Germ cell mutagenicity: can presumably cause genetic defects.

Carcinogenicity: may cause cancer.

Specific target organ toxicity in the case of single exposure: the substance or mixture is not classified as a target organotoxic.

Specific target organ toxicity on repeated exposure: the substance or mixture repeated exposure is not classified as a target organotoxic.

Further information: The toxicological properties of the product have not yet been fully investigated, dangerous properties cannot be excluded. The product must be handled with the care necessary with chemicals.

12 Ecological information

Potential damages unknown. Do not empty into drains / groundwater / soil.

13 Disposal considerations

Used solutions and solutions that are past life must be disposed of as hazardous waste, it is to follow the local guidelines; do not release to drains, groundwater and/or soil.

14 Transport information

Not classified in transport of dangerous goods.

15 Regulatory information

15.1 Safety, health and environmental regulations/specific legislation for the substances or mixture.

National regulations: no

Restriction of occupation: no

15.2 Chemical safety assessment

A chemical safety assessment has not been carried out

16 Other information

All chemicals are potentially dangerous. Therefore they have to be handled only by specially trained personnel with the necessary care. Although certain hazards are described herein, we cannot guarantee that these are the only hazards. This information is based on our present knowledge; however, it offers no assurance of product properties and establishes no contract legal rights. To our experience and the information provided the product does not have any harmful effects when used and handled according to specifications.
